

Job Description: Research Engineer

About RAAPID

We are reimagining risk adjustment for healthcare, insurance, and technology businesses.

With a comprehensive workforce of over 500 members who are industry veterans, based out of India and US, RAAPID's pedigree is built upon Trust, Tech Competence, Stability and Tech Innovation.

Healthcare doesn't stop at 5 o'clock. Neither do us. We know this because it has been close to a decade now. We want your organization to be successful and have accurate reports when you need them. That's why we make Patient service a priority and ensure our technology stays up-to-date to avoid errors entirely.

Every Organization Is Unique and Deserves Personalized AI Solution, and RAAPID is a completely integrated, AI-powered disease understanding & extracting engine that operates on any patient data—including the free text, unstructured content—to capture complete Risk of the patients.
